

Experienced Maintenance Supervisor

CPM Century Extrusion, a designer and manufacturer of twin screw co-rotating compounding extruders, has a career opportunity for an Experienced Maintenance Supervisor that is both challenging and rewarding.

This position requires 10+ years of 'hands-on' mechanical, electrical, controls and software experience with various CNC and Manual Machining Centers.

Responsible for coordinating/completing repairs with an in-house maintenance tech, machine OEM's and other suppliers in order to maximize manufacturing throughput and minimize down-time. Strong diagnostic and trouble shooting skills required. Ensure tools, drawings, documentation and work instructions are current and organized. Also responsible for building and site equipment, along with supervisory oversight of a maintenance tech, lube tech and janitor.

Prefer prior experience addressing OSHA, Insurance and Safety Team recommendations and providing management recommendations. Candidate is also a key contributor to our Capital Planning Process and will work with our current Maintenance Supervisor (who is retiring in 2019) over the next 18 months.

This full-time, permanent position includes our competitive wage and benefit package.

Century Extrusion serves primarily for the polymer industry, but also for food, pet food, rubber, chemical, petrochemical and several other industries as well. Our customer base spans the globe, with extruders installed in several Asian, European, and South American countries, as well as throughout North America.

Century Extrusion is located in Traverse City, a beautiful area in the Northwest corner of Michigan's Lower Peninsula, with year round attractions including a vast number of gourmet restaurants, many beaches, golfing, nearby skiing, great fishing and hunting, a large number of festivals and events, and much, much more.
